

# Student Tours: Educational Travel

## Let Us Manage Your Educational Touring

The BusBank has over 16 years of experience in the transportation industry servicing student travel with an emphasis on educational tours.

*"Our educational touring clients look to BusBank for service that is professional, punctual and cost-effective."*

*– Philip May, Senior Account Exec.*

### Executive Summary

Throughout our history, BusBank has helped transport thousands of students all over North America for educational travel; trips range from inbound and outbound airport transfers, to multiple day excursions exploring the United States.

Our expansive network of operators allows us to accommodate your groups touring needs regardless of amenities, budget or tour intricacy – all while offering the best value.

Hiring BusBank to manage your educational touring is not only economical but a reliable and professional option to move students efficiently throughout the country.

## How BusBank Can Help

- Inbound & Outbound Tours
- Airport Transfers
- Multiple Bus Types & Sizes
- WiFi & Power Outlet Enabled Buses
- Buses At All Destination Cities
- College Tours & Visits

## What We Can Offer

The BusBank understands the specific needs that come along with operating and managing educational tours. Over the years we have worked hard to set us apart from the competition by offering the following:

Industry Leading Insurance – Due to the nature of student tours we take safety very seriously. Every interstate operator in our network must hold a valid Operating Authority as per the USDOT and carry a minimum of \$5,000,000 of insurance coverage. Additionally, BusBank carries an umbrella policy of up to \$10,000,000 & additional insurance can be added if required.

Greatest Flexibility – With our long standing history in the industry we have been able to build and maintain relationships with operators all over the country – because of this we will be able to properly match you and your group with the best possible option based on trip criteria.

Most Bus Type Options – Due to our vast network of operators we're able to provide your group with many unique vehicle options including non-standard 35, 39, 45, 48 and 58 seat passenger vehicles.

## The BusBank Difference

By working with independent operators rather than owning buses we are able to maintain the flexibility to customize transportation solutions that fit the needs of the client in any situation.

Our independent network of bus operators is the largest of its kind in all of North America. What helps to set us apart is our in-depth industry knowledge that has been built upon over the last 16 years.

Operators are added to our network only after an initial screening process. They are able to stay in our network only by providing our customers with quality and dependable transportation as promised.

As we work with each carrier, we build a detailed history of their operations and performance. Every day we learn more about each carrier's strengths & weaknesses and how the services of a particular operator can fit the specific needs of particular customers.
